DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on January 10, 2006 and October 21, 2003 is noted. The submission is in compliance with the provisions of 37 CFR 1.97 and 1.98. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Goodman (6634882). Goodman discloses a wafer holder comprising, a top surface having a plurality of protrusions or nubs (220) having a surface area 70mm^2 or less (Column 6, Lines 17-26) and are inherently 40% or less than the surface area of the wafer which can easily be seen in figures 1A-8.

Art Unit: 3723

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Seidensticker (3786601) and Miura et al. (6545267) disclose wafer holders having protrusions formed on a top surface for supporting a wafer.
